

Adwait Jadhav

Machine Learning Engineer • Fullstack Developer • Game Developer

International Institute of Information Technology (I Square IT) • 2025 Pass out

Projects

IIC website for college

- We had to develop a website hosted on college servers to display information about IIC community in our college
- We had three team members working on the website, though we were on a strict schedule and we had to conform to college norms which created quite a few problems near the end, we managed to successfully host the website
- The website hosts the details of the IIC I2IT

Skills Developed: HTML, CSS, Javascript

Position of Responsibility

Web design and development member for IIC I2IT

- Managed to successfully develop and maintain the IIC I2IT website

Achievements/ Extracurricular Activities

- Achieved Gold Badge for Problem Solving in HackerRank
- Completed the Hacktoberfest 2022 Event with 5 open source contributions

Tagline

I like learning new skills and applying them to create useful solutions to problems
